MIZAR

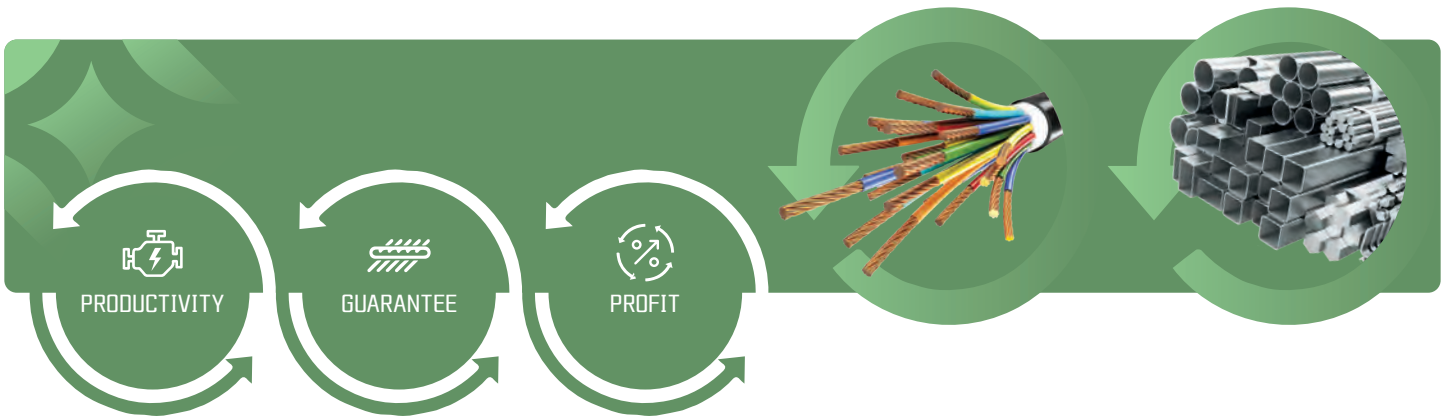

AS SERIES

ALLIGATOR SHEARS

MIZAR AS Series, alligator shears are designed to cut all kinds of scrap with hydraulic force. Steel, aluminum, copper, zinc, lead, etc. are the most common used materials for cutting. For longevity performance, the cylinder rods, which are especially "hard chrome plated" for resistance against any damage, are induction hardened in order to maintain the maximum strength. In MIZAR AS Series, Uddeholm blades and "BOSCH REXROTH" hydraulic system are preferred. All electrical / electronic equipments are "SIEMENS and SCHNEIDER" . CE and EAC certificate is available.

TECHNICAL SPECIFICATIONS

FEATURE	VALUE
BLADE LENGHT	400 mm
CUTTING SPEED	15 - 20 cuts / min.
CUTTING FORCE	100 Tons
PRESSURE	160 bar
MOTOR	7,5 kW
LENGTH	1.800 mm
WIDTH	900 mm
HEIGHT	1.500 mm
WEIGHT	1.200 Kg

** Production capacity per hour varies depending on the type of material to be processed. The manufacturer reserves the right to make any changes.*

TURNKEY SYSTEMS

MIZAR Semi - Full Automatic Plants, are designed according to the customer needs, in terms of model and positioning. Complete systems combined with professional MIZAR Series and Equipments to provide maximum efficiency. MIZAR offers the possibility of manufacturing a complete tailored system and assured turnkey project, with a variable capacity of infeed materials, starting from 500 kg/h up to 1.500 kg/h.
